Dolphin Magic

*Brilliant technology for crystal clear results*

*The advanced, user friendly  
robot pool cleaner for all types of private pools*

Dolphin Magic

**Maytronics does it again!**

This newest model in the popular Dolphin line, produced by the global pioneer in robotic pool-cleaning technology, brings you more user-friendly features and state-of-the-art innovation than ever before. A peerlessly efficient 100-minute work cycle, the optimal ratio of floor to wall cleaning time, automatic push-button operation, streamlined contour, two luminous headlights, cord swiveler and simpler maintenance are all standard in Dolphin Magic - the result of Maytronics' tradition of careful attention to customer needs.

**Leaves every inch perfectly spotless**

Dolphin Magic is guided by a self-learning scanning system that maps and memorizes the contours of any pool. The software programming ensures that every centimeter of the pool is meticulously covered in an efficient cleaning pattern: power-scrubbing the floors, walls and corners, and leaving behind a sparkling pool from top to bottom. Dolphin Magic's 100-minute work cycle optimizes the cleaning time spent on floors versus walls for best results. Powerful sweeping action thoroughly eliminates dirt and organic debris, trapping the impurities in the robot's large filter. The special whirlpool action of Dolphin Magic also disperses chlorine and other solvents evenly through the cleaned water, for optimal efficiency and more cost-effective use of pool chemicals.

**No professional operating skills needed**

The innovative features of Dolphin Magic are designed for maximum ease of use. The robot's automatic push-button operation provides effortless cleaning - just plug it in, place it in the pool and Dolphin Magic

does the rest. Its large one-way filter bag with removable top lid is the only one of its kind, allowing for the quick collection of debris, and even quicker emptying, cleaning and replacement. The unit can also reach the entire pool without climbing, a clear advantage for smooth tiled pools. The **CE-certified** electrical system is guaranteed water-safe and reliable.

**Dolphin Magic comes with a 3-year warranty.**

**New tangle-free cable design**

Dolphin Magic's unique cable swiveler - made exclusively by Maytronics - keeps tangles and snarls out of the electrical cable as the robot moves around the pool. Even when it changes direction or backs up, the mechanism keeps the cable straight, eliminating a frequent cause of delays in the cleaning process and ensuring easier cable maintenance.

**Dolphin Magic - The clearest choice for  
easy and efficient pool maintenance.**
