

GLADIATOR POOL CLEANER

The Gladiator is a computerised pool cleaner that is pre-programmed to clean, vacuum and filter dirt from the bottom of your pool, completely automatically!

The Gladiator will thoroughly clean any shape or size of domestic pool.

The Gladiator is light and has its own built-in filtration system which operates independently from the main pool filtration system, eliminating the need for bulky hoses.

The Gladiator has been programmed to avoid ladders and other obstacles and as such, reliability is paramount. Simply take the Gladiator out of the box and put it in the pool. It does not require any type of installation.

The Gladiators have the 'Aqua Smart' system built in. This system is an intelligent program for swimming pool cleaners which helps the pool cleaner to clean efficiently all types and shapes of swimming pools in 1 hour approx (90 minutes for larger domestic pools)

	GL1050
Pool length	Up to 80m ²
Volume of filtered water	16m ³
Cable	18m
Motor	12V submersible
Pump	12V submersible – high performance
Filter	2 micron reusable
Electric specifications	220V/ 50Hz
Volts in the water	24V
Package dimensions	51 x 50, 5 x 52.5 cm
Weight	8.2 Kg

SPECIFICATIONS

- Completely automatic, it does **not** require installation
- Traction motor
- 110W 24V pump
- Polyester filter
- Supplied with trolley to facilitate movement
- Pool cleaning cycle – 1.5h maximum
